Maine Remonstrance

[Maine Republic . Com](http://MaineRepublic.Com)

[Maine Remonstrance](#)

Hey We did not forget about this. We've Been Very occupied In the Details of presenting this to Gov Paul LePage and him invited us back for another presentation on Saturday with Michael Coffman, Henry Joy and Roger Ek to present Agenda 21 and how it is part of every department of the State of Maine.

The house and Senate has not responded and placed a lawyer between us and them. Which I think is treason because a lawyer is a foreign citizen according to the first 13th Amendment and the BAR is associated with the Communist Party through the Lawyers Guild as reported to Congress through special hearings in the 50's. This should make for a treasonous act where our Legislature only wants to deal with the Remonstrance through a lawyer who is a foreign citizen. Sounds like a misprision of Treason to me.

By the way the Remonstrance has more authority than any legislation or court authority because it has the authority of Article 1 Section 2 Citizens authority to ordain or abolish the government and reset to a new administration.

Just remember that "We the People of Maine" by the grace of God established this free and independent state styled as the State of Maine and ordained the constitution of the same.

We will be taken this more public and if there is any one who wants to help us you can email any one of us on the Remonstrance Signers.

We are also planning to present this remonstrance to every legislature and ask if he or she can support this document or reject it as not their job. Need help to get it to your personal Rep or Sen in your district. We want to know if they support their oath to us or to the lobbyist, Corporations, Lawyers or Bankers. We find that the government policies have restricted the citizens from being able to contact them at the State Capital. No emails because it is spam and they don't have the Mail boxes that anyone can just deliver them to without mailing with a stamp.

The Bottom line is that We the People of Maine must secure our free and independent state for the coming Financial collapse or martial law after they usurp our gun rights here in Maine where we have the right to bear arms for common defense without question.

The Federal Government has no authority over "We the People of Maine". They have usurped government power unconstitutionally. So we also have to demand our legislature send an Remonstrance to the Federal Government to demand that they cease and desist any and all unconstitutional activity.

Join in with your support to make Maine a Free and Independent state that respects the unalienable natural law rights, which includes the right to acquire possess and protect property, of "We the People of Maine"
